THE CORNELL HOTEL & RESTAURANT ADMINISTRATION QUARTERLY

(This magazine is indexed by subject each year in its Bibliography, published in the August (No. 2) issue.)

Table of Contents for Volume 8

May 1967 • Vol. 8, No. 1

PEOPLE — PRODUCTIVITY — PROFITS

Our Industry-Wide Challenge, *J. Frank Birdsall, Jr.* Meeting tomorrow's needs by planning ahead in food service and management. P. 2–3.

The Economic Outlook 1967–1977 Toward the Trillion Dollar Economy, *Thomas O'Brien.* The effects of government economic policy on the future trends of economic growth. P. 4–7.

The Food and Lodging Industry. Why management must continue to make gains in food and lodging productivity. P. 8, 16.

Innovational Thinking — Fulcrum for Organizational Growth, *James J. Cribbin, Ph.D.* How to encourage improving an already workable system to save more time and money yet increase productivity. P. 9–16.

How to Live with the Unions, *Joseph P. Zaffy.* Management's outlook in dealing with unions. P. 17–22.

Management's Role in Worker Productivity, *John Counts.* How management can motivate the organization for the best results for investors and workers and for the common goal — profit. P. 23–27.

Profiles of Workers in Four Large Hotels, *Dr. Neil H. Cheek, Jr.* A three year study of age level, educational background and general promotibility of the hotel industry's workers. P. 28–31.

On-The-Job Training and AH&MA's Educational Institute, *J. William Conner.* The advances being made in improving training methods. P. 32–35.

CHRIE Aids Industry in Education Programs, *Dr. H. B. Meek.* Community action is needed to develop training programs in high schools, technical schools and junior colleges. P. 36–38.

Upgrading Food Service in Catholic Institutions, *Brother Herman E. Zaccarelli.* Solving the food service problem by directing help toward the special needs of Catholic institutions. P. 39–42.

A Case History in Hiring Slow Learners, *Frank J. Haberl.* The author shows it's good business to hire slow learners. P. 43–48.

College Students as a Labor Source, *Thomas P. Root.* Depending on students to make food service operation a success. P. 49–51.

My Experience as a Student Employee, *Bob Gebhardt.* A case in point. P. 51–54.

Projected Labor Costs in Future Food Systems, *M. B. Burritt.* Planning ahead to utilize men, menus and equipment in today's food service. P. 55–64.

Dutch Pantry Steps Up Restaurant Productivity. Comparing food and labor costs from conventional to convenience food preparation. P. 66.

Marriott-Hot Shoppes' Program for Productivity, *Richard F. Schoff.* Food service operator's only guarantee for success is to use quality frozen foods. M-HS outline their six-phase program. P. 67–72.

Meat Loaf Vienna and Chicken en Cocotte — Tested Quantity Recipes (Color insert between P. 72–73.)

Today's Convenience Foods, *Roslyn Willett.* The author intends to provide the facts and a realistic interpretation of the current status of prepared foods for the institutional market. P. 73–79, 85.

Meat Palatability, *Albert Levie.* Testing meat for acceptance. P. 80–85.

Permissive Load Control — A New Approach to Electric Hot Water Heating, *Kenneth A. Ranchil.* Aquainting people with an economical method, being used successfully by Treadway Inn, to solve the problem of providing large quantities of hot water. P. 86–88.

Airline Food Service, *Philip J. Parrott.* Which system to use on airlines, casserole, chilled food or frozen food? Advantages and disadvantages given. P. 90–92.

Airlines Food Service Problems. Panel discussions and comments made during the Airlines Food Service Seminar, January 16–18, 1967. P. 93–97.

Airline Food Service Equipment, *Werner Sell.* The author suggests needed changes in the present food equipment set-up for airlines. P. 97–104.

Equipment Sanitation in Airline Flight Kitchens, *Dr. Ralph C. Behm.* Problems and recommendations are discussed to help keep flight kitchens sanitary. P. 105–113.

Ready Foods Research Advances at Cornell, *H. Alexander MacLennan.* An outline of the progress made since the first report in 1965 of the School's Ready Foods program. P. 114–116.

Book Reviews. P. 116–118.

August 1967 • Vol. 8, No. 2

RESEARCH ISSUE

The U.S. Eating-Out Market. Food service is offered by 367,000 places in the nation, whose sales volume is upward of $22 billion. Public eating establishments dominate the market. P. 2–4.

Why Food Prices Must Rise, *Kay Barnes.* Farm income has lagged behind those of other industries. Today's cost-price squeeze is forcing farmers into industrial jobs. Meanwhile other nations bid for our food crops. P. 5–8.

A Modified Calendar for Periodic Comparisons in Hotels and Motels, *H. Alexander MacLennan.* (inserted between P. 8–9, Calendar for Hotel-Motel Use.) A 13-period calendar that standardizes weekly and quarterly periods and provides for holiday periods should make operating comparisons more valid. P. 9–15.

Social Organization of the Cocktail Lounge. P. 16.

Computers in Hotels, *Prof. C. I. Sayles.* A "computer" explains how it can work with new hotel equipment to handle reservations, confirmations, dining room charges, telephone calls, and quickly produce guest bills. P. 17–31.

Standardized Ready Food Recipes. Four recipes are presented for frozen cooked food to be prepared and served on hotel or restaurant premises. P. 32.

A Productivity Index for Cafeteria Workers, *John F. Freshwater.* A productivity index is developed for single-line and double-line cafeterias. Recommendations are made for potential labor saving through better worker scheduling. P. 33–38.

Plastic Dinnerware — Report of a Two-Year Study, *H. Alexander MacLennan.* Plastic dinnerware is suitable to many food service operations. Low replacement costs make it economical. P. 39–43.

Food Service Occupational Training — 1966 Enrollment, *Dr. Chester G. Hall, Jr.,* P. 44.

Man in a Changing Environment, Mrs. Eleanor S. Foster. People need "space bubbles" and these must be taken into consideration in architectural design. P. 45–48.

A Bibliography for Hotels and Restaurants, *Katherine Spinney.* Articles selected from the hotel and restaurant press are indexed according to subject and content. Lists of publishers and trade organizations are also given. P. 50–107.

Book Reviews. P. 108.

November 1967 • Vol. 8, No. 3

TRANSPORTATION AND LODGING

Innkeeping Future Up in the Air, *William Morton.* The mammoth new jet planes will funnel passengers into city hotels so that every day will be similar to handling a huge convention. The airlines are planning now to expedite this change in passenger service. What are hotels doing? P. 2–10.

Success is a Journey, Not a Destination, *Leonard Hicks.* More facts on the coming revolution in travel. P. 11–21.

The Northeast Corridor: Speed Up in Rail Travel Ahead. P. 22–31. High-speed trains and improved commuter service promise live new arteries to restore center cities. P. 22–31.

Transportation, Lodging, and Food. The relation between transportation and lodging is reviewed through brief histories of stagecoach, canal, and railroad travel. Included are the stories of a stagecoach inn, a canal motel-boatel, two railroad station restaurants, and a boxcar night club. P. 32–52.

Tested Quantity Recipes for Poultry. (Insert between pages 52–53.)

Why Apprentice Chefs Need On-Job Training, *Chef Henry Haller.* An experienced hotel chef explains why classroom training is not enough. P. 53–56.

Cheese Making in France and Italy, *Prof. Frank V. Kosikowski.* The cheese-making areas and methods of two European countries are described.

Hotel Sales and Travel Agencies, *Harold E. Green.* Hotels can capitalize on the services of travel agents. P. 63–68.

No-Iron Linens and Uniforms. *L. A. Bradley,* AH&MA's laundry consultant, and *Robert M. James,* vice president and director of operations for Howard Johnson's Motor Lodges set forth the advantages and proper handling of no-iron sheets, pillowcases, and uniforms. P. 69–79.

The Selection, Care, and Maintenance of Commercial Carpets. Three chapters of Bernard Berkeley's revised manual on carpet selection are presented. P. 79–97.

Book Reviews. P. 98.

February 1968 • Vol. 8, No. 4

PACKAGING TRAVEL

The Quest for Identification, *Stephen W. Brener and A. Carmi Gamoran.* A thorough discussion of the factors involved in affiliating with a franchise chain or referral network. Detailed chart of current fees and information included. P. 2–10.

Reservation Systems: Communication Networks That Sell Rooms, *Bernard Iliff.* A summary of new developments in reservation programs, including Telemax, Holidex, and Wide Area Telephone Service. P. 11–16.

Tested Quantity Recipes. (Insert between P. 16–17.)

Red Ink and U.S. Travel. Americans spend more on foreign travel and less in promoting tourism to their own country than most nations of the world. P. 17.

Hawaii: Tourism Development, *Robert R. Midkiff.* Three problems accompany Hawaii's phenomenal success in the tourist industry: financing expansion, providing manpower, and determining markets. P. 18–24.

Hawaii: A Lesson in Planned Tourism Development, *Clare A. Gunn, Ph.D.* Planning is the key to modern resort development. Several of Hawaii's new projects are examined. P. 24–30, 36.

Ireland Bids for New Hotels. Ireland has done much and is planning to do more to increase its tourist attractions. P. 31–36.

The Island of Rhodes, Tourism Blueprint for 1968, *Albert E. Koehl.* Rhodes reassesses its tourism potential. P. 37–42.

Tipping: Travel's Tedious Tax. Problems and advantages of tipping are considered, along with the possibility of abolishing the system. P. 43–46, 50.

Tipping in American-Plan Resorts (A Survey), *H. Victor Grohmann.* To tip or not to tip: pros and cons from a sampling of guests. P. 47–50.

Men, Machines, Productivity, *Lendal Kotschevar, Ph.D.* The need for higher productivity is urgent in the food service industry. Dr. Kotschevar presents aspects of the problem and possible solutions – including eliminating kitchens. P. 51–55.

Ready Foods — The Application of Mass Production to a la Carte Food Service with Prepared-to-Order Foods, *H. Alexander MacLennan.* Most recent developments in the Cornell Ready Foods System and the application to individual operations. P. 56–68.

Food Protection for Today's New Foods, *Roslyn Willett.* Mrs. Willett looks at new foods and new food systems in the light of the preservation problems they present. P. 69–75.

Refrigeration of Meat, *Albert Levie.* The author explains what happens when meat is held in cooler and freezer storage. P. 76–81.

CHRIE Looks Toward Expanded Program. Events of interest at CHRIE's December 1967 meeting are summarized. P. 82.

Fire Insurance Rates and Restaurant Design, *Richard L. Haugland.* Charts, diagrams and documentation will provide management with the knowledge and insight to administer effective prevention measures. P. 83–88.

Fire Prevention Planning for Hotels and Restaurants, *Prof. Robert M. Chase.* Efficient planning can prevent fires before they start! P. 89–92.

When the Market Moves, Should You Move Too?, *Keith Guenther.* Kemoll's Restaurant in St. Louis uses superior merchandising to overcome loss of its local market. P. 93–98.

An Answer to the Tipping Problem, *R. D. Musser.* State minimum wage laws forced one hotel to adopt a workable alternative to the tipping system. P. 99–101.

Books and Periodicals Reviewed. P. 101–104.
